

Mae'r diciâu mewn gwartheg wedi'i ddisgrifio fel yr her fwyaf sy'n wynebu iechyd anifeiliaid yng Nghymru.

Mewn ymdrech i frwydro'r lled o'r afiechyd hwn, mae Prifysgol Aberystwyth yn sefydlu Canolfan Rhagoriaeth TB Gwartheg fel rhan o raglen Sêr Cymru II a ariennir gan Lywodraeth Cymru, Cyngor Cyllido Addysg Uwch Cymru, Sefydliadau Addysg Uwch yng Nghymru a'r Gronfa Ddatblygu Ranbarthol Ewropeaidd.

Fel rhan o'r fenter, bydd y ganolfan yn cynnal cynhadledd TB flynyddol gyda'r nod o ddarparu gwybodaeth gyfoes i rhanddeiliaid sydd wedi'u heffeithio gan yr afiechyd.

Darperir y wybodaeth drwy gyfres o ddarlithoedd a thrafodaeth panel, gan gynnwys y diweddaraf am ddileu TB mewn gwartheg wrth Brif Swyddog Milfeddygol Cymru, Yr Athro Christianne Glossop.

Diagnosis o'r diciâu mewn gwartheg:

Arferion presennol ac arloesedd i'r dyfodol.

Bovine TB has been described as the most pressing animal health challenge facing Wales.

In efforts to combat the spread of this disease, Aberystwyth University are establishing a Centre of Excellence for Bovine Tuberculosis backed by Sêr Cymru II which is funded by Welsh Government, the Higher Education Funding Council for Wales, participating Welsh Higher Education institutions and the European Regional Development Fund.

As part of this initiative the Centre will establish an annual TB conference with the aim of providing those stakeholders affected by the disease with the latest information on various aspects of disease control through a series of lectures and panel discussions. Including an update on progress with bTB Eradication in Wales by Chief Veterinary Officer for Wales, Professor Christianne Glossop
